PROFESSIONAL SUMMARY

Results-driven Software Developer pursuing a B.E. in Artificial Intelligence and Data Science, with hands-on experience in full-stack web development and Android application engineering. Demonstrated ability to architect and deliver production-ready systems — including a hospital management platform with AI-powered triage and a Firebase-backed Android marketplace app. Adept at translating complex requirements into clean, maintainable code across Java, JavaScript, React.js, and MySQL. Eager to contribute technical depth and a data-science mindset to a forward-thinking engineering team.

KEY HIGHLIGHTS

- Production-ready AI integration** — embedded a health chatbot into a live hospital system, handling real triage queries.
- Full-stack ownership** — independently designed, built, and deployed both frontend UI and backend APIs for client-facing applications.
- Academic excellence** — scored 94.20% in SSC; consistently ranked among top performers in the AIDS programme at DY Patil.
- Cross-platform proficiency** — comfortable shipping native Android (Java/XML) as well as responsive web apps (React, PHP, MySQL) from a single project cycle.

WORK EXPERIENCE

Android Development Intern Apr 2025 – Jul 2025
Idealtech Info Pvt. Ltd. — Nashik, Maharashtra
Project: Fam Care Center (Hospital Management System)

- Architected a full-stack hospital management system with role-based authentication, patient records, and secure MySQL data layer.
- Engineered a real-time video consultation module, enabling doctors to conduct remote patient sessions.
- Integrated an AI-powered health chatbot for automated primary triage, reducing administrative workload by an estimated 30%.
- Built a responsive, mobile-first UI (HTML, CSS, JavaScript) streamlining nurse and admin workflows across 5+ modules.
- Tech Stack: JavaScript, PHP, MySQL, HTML5, CSS3.

Android Application Developer Jan 2025 – Mar 2025
Personal Project
Project: RoomieSpot (Android App)

- Designed and built a property-rental Android app featuring listings, advanced search & filters, favorites, and location-based search.
- Implemented Firebase Authentication and Firestore for real-time data sync across landlord and tenant user roles.
- Developed a landlord contact flow with in-app messaging initiation, improving user engagement.
- Tech Stack: Java, Android Studio, Firebase, XML.

EDUCATION

B.E. in AI & Data Science

D.Y. Patil Institute of Technology, Pune
Pursuing (2023–2027)

Diploma in IT

Government Polytechnic, Nashik
2020–2023

SSC — 94.20%

Maratha Highschool, Nashik
2019–2020

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Debugging
- Communication
- Team Collaboration
- Time Management
- Self-motivated
- Adaptability

FEATURED PROJECTS

Fam Care Center — Hospital Management System

Internship Project

JavaScript · PHP · MySQL · HTML · CSS

- End-to-end hospital system covering patient records, appointments, billing, and staff management.
- AI health chatbot module integrated via API for automated symptom-checking and department routing.
- Video consultation feature with session management, enabling telehealth capabilities.
- Role-based access control (Admin, Doctor, Nurse, Patient) with secure PHP session handling.
- Fully responsive design tested across desktop and tablet viewports.

RoomieSpot — Property Rental Android App

Personal Project

Java · Android Studio · Firebase · XML

- Native Android app serving two roles: tenants browsing listings and landlords managing properties.
- Real-time database (Firestore) with offline persistence, ensuring seamless UX on low connectivity.
- Google Maps SDK integration for location-based property discovery within user-defined radius.
- Favorites/bookmarking system with persistent user preferences stored in Firebase.
- Clean Material Design UI with custom XML layouts across 8+ activity screens.

ACADEMIC BACKGROUND

Currently in the 3rd year of a **B.E. in Artificial Intelligence and Data Science** at D.Y. Patil Institute of Technology, Pune — one of Maharashtra's premier engineering institutions. The programme combines core software engineering with machine learning, data analytics, and intelligent systems, directly underpinning the AI integrations delivered in my internship project. Prior foundation: Diploma in IT from Government Polytechnic Nashik (2020–2023); SSC from Maratha Highschool with a distinction of **94.20%** (2019–2020).

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

AI Tools and ChatGPT Workshop

2024

Be10X

Hands-on training with prompt engineering, GPT-4 workflows, and AI-assisted productivity tools.

GenAI Powered Data Analytics Job Simulation

2024

Tata Group via Forage

Simulated analyst role using generative AI to extract business insights from large datasets.

Python Programming Certification

2023

Skills Up India

Core Python — data structures, OOP, file I/O, and introductory data analysis with pandas.

I hereby declare that the information furnished above is true and correct to the best of my knowledge. I am open to background verification and reference checks.
